MAMUSA®

OIL, GAS & ENERGY

A TRACK RECORD OF LEADERSHIP AND QUALITY

With nearly seven decades of experience, **MAMUSA** has established itself as a trusted and reliable supplier to the national industry, serving both the public and private sectors, including the energy sector. We are committed to ensuring uninterrupted industrial operations through manufacturing and the delivery of first-class engineering services, 24/7 .

We are the Venezuelan company with the longest history of ISO 9001 quality management certification.

STRATEGIC ALLIANCE

We maintain a long-standing partnership with **PETROLINK ENERGY**, a leading group with extensive experience in power generation and compression, with operating locations in Oklahoma and Texas, USA. This partnership combines its specialized technical expertise with our operational capabilities in Venezuela.

AERODERIVATIVE TURBINES
AERODERIVATIVE TURBINES

AERODERIVATIVE TURBINES

HIGH PERFORMANCE QUALITY

Derived from aircraft engine technology, these turbines are adapted to generate electricity or drive industrial equipment. Our aeroderivative turbines are known for high efficiency, rapid start-up, compact design, and operational flexibility.

200+ TURBINES IN INVENTORY

Overhauled units ready for immediate deployment.

COMPREHENSIVE TECHNICAL SUPPORT

Highly specialized technical personnel, advanced diagnostics, installation, and annual major maintenance, backed by an extensive inventory of parts and spares.

NATIONAL WORKSHOP

We are prepared to establish a workshop in Venezuela to meet these requirements, strengthening our ability to field a large team of land-mounted and trailer-mounted turbine specialists. This capability will help revitalize Venezuela's national power grid and support the wider Latin American region.

RELIABLE INVENTORY AND SUPPLY

We maintain a comprehensive inventory of warranted components and genuine spare parts for turbine repair and maintenance, backed by a specialized technical team. Our service package includes diagnostics, repairs, installation, and annual major maintenance.

OIL, GAS & ENERGY

VALUE PROPOSITION

Comprehensive services for power generation, gas compression, and full maintenance and repair of high-performance equipment.

COMPREHENSIVE OVERHAUL

High-level technical procedures using genuine parts. Guaranteed repair of turbines and compressors. We rebuild and restore equipment to near-new condition, ensuring full operating capacity and short turnaround times.

PRODUCTION CAPABILITIES

Seventeen divisions operate independently to deliver world-class products and services.

- Petróleo, Gas y Energía
- Empaquetaduras de Compresión
- Sellos Mecánicos
- Juntas Espirometálicas
- Instalaciones Industriales
- Filtración Industrial
- Fricción Industrial
- Grapas para Reparación de Tuberías
- Seguridad Industrial
- Mantenimiento y Reparación Integral de Valvulas y Compresores
- Aislantes Térmicos
- Metalmecánica y Cromados Industriales
- Productos de Distribución
- Aceites y Lubricantes
- Correas, Mangueras y Bandas Transportadoras
- Proyectos, Obras y Servicios
- Productos de Distribución
